NAOMI COLLINS

Data Analyst

+44 7495329974 | naomicollins.career@gmail.com | London, UK | www.linkedin.com/in/naomianncollins | portfolio | GitHub

CAREER SUMMARY

Data Analyst with 5+ years of experience transforming complex datasets into actionable business insights across finance, retail, and operations. Strong expertise in SQL, Python, Power BI, and Tableau, with hands-on experience in KPI design, forecasting, automation, and predictive modelling. Proven ability to improve operational efficiency, optimise revenue streams, and support executive decision-making. Seeking data-driven roles within global organisations where analytics drives strategic growth.

EXPERTISE

Data Cleaning & Transformation | ETL & Data Preparation | KPI Design & Performance Monitoring | Forecasting & Trend Analysis | Predictive Modelling | Dashboard Development & Executive Reporting | CRM Analytics | Strategic Thinking

TECHNICAL SKILLS

SQL (Advanced) | BigQuery | Python (Pandas, NumPy, Scikit-learn) | R | Data Visualisation: Power BI (Advanced) | Tableau (Advanced) | Data Tools (Alteryx, Salesforce, NetSuite, Oracle, Documentum) | Excel (Advanced – PivotTables, Power Query)

PROFESSIONAL EXPERIENCE

FREELANCE OPERATIONS & DATA ANALYST | Clifton Group | London, UK — Jun 2023 – Present

- Analysed 10,000+ Deliveroo transactions to optimise inventory planning, reducing stock waste by 22% and increasing product turnover by 18%.
- Built demand forecasting models to identify slow-moving and near-expiry stock, improving sell-through rates by 25% and increasing margin recovery.
- Improved forecasting accuracy by 30%, reducing over-ordering and freeing up working capital across retail operations.
- Managed end-to-end rental income and financial reporting across three business entities, streamlining VAT and supplier reconciliation processes to reduce reporting time by 40% while maintaining full compliance.

Impact: Reduced operational waste, strengthened cash flow control, and enhanced financial visibility to support scalable growth.

DOCUMENTATION CONTROLLER (BASED IN SPAIN) | Technica's Reunidas | Bangalore, INDIA — Jun 2022 – Jun 2023

- Managed 1,500+ engineering documents using Documentum with zero compliance errors.
- Improved document retrieval efficiency by 30% by restructuring workflows and metadata classification.
- Performed structured data cleaning and transformation to support compliance reporting.
- Maintained strict version control across 500+ document revisions.

Impact: Increased reporting speed and data reliability across cross-functional global teams.

FINANCE & OPERATIONS ASSISTANT | Azuga (Bridgestone Company) | Bangalore, INDIA — Apr 2022 – Dec 2022

- Analysed 1,200+ purchase and sales orders ensuring 98% on-time billing accuracy.
- Developed automated Excel dashboards adopted by senior management for KPI monitoring.
- Reduced invoice and shipping errors by 20% via structured quality-control analytics.
- Supported inventory performance analysis leading to 97% on-time delivery rates.

Impact: Strengthened billing integrity, reduced operational errors, and improved logistics performance.

SALES DEVELOPMENT & CRM ANALYST | Azuga (Bridgestone Company) | Bangalore, INDIA — Jan 2021 – Apr 2022

- Analysed CRM funnel data to improve lead-to-opportunity conversion by 25%.
- Generated 300+ qualified leads per quarter contributing to 20% pipeline growth.
- Maintained 100% Salesforce CRM data accuracy through segmentation and validation processes.
- Recognised as Top Performer (H1 2021).

Impact: Increased pipeline efficiency and revenue opportunity through data-driven sales optimisation.

EDUCATION

MASTER'S DEGREE | Big Data & Business Intelligence | University of Greenwich, London — 2024

BACHELOR'S DEGREE | Physics, Mathematics & Computer Science | St. Joseph's University, Bangalore — 2020

PROJECTS

ANALYSING STUDENTS' MENTAL HEALTH

- This project analyzes how studying abroad impacts international students' mental health, examining depression, social connectedness, and acculturative stress using PostgreSQL to uncover patterns related to length of stay and well-being. Analyzing Students Mental Health

ANALYZING MOTORCYCLE PART SALES

- I analyzed sales data for a motorcycle parts company to uncover revenue trends across product lines and warehouses. Using SQL, I calculated net revenue, accounted for payment fees, and focused on wholesale transactions, delivering clear insights to support data-driven decisions. Analyzing Motorcycle Part Sales

HYPOTHESIS TESTING WITH MEN'S AND WOMEN'S SOCCER MATCHES

- Applied statistical testing skills to historical data of men's and women's international soccer matches. Worked with a major online sports media company dataset specializing in soccer analysis and reporting, testing whether women's international matches result in more goals scored than men's. Hypothesis Testing with Men's and Women's Soccer Matches

INVESTIGATING NETFLIX MOVIES

- Explored Netflix movie data and performed exploratory data analysis for a production company to uncover insights about films from a defining decade. Investigating Netflix Movies

EXPLORING NYC PUBLIC SCHOOL TEST RESULT SCORES

- Every year, school test results impact the admissions outcomes of millions of students. This project analyzes standardized SAT performance data from public schools across New York City to identify schools with top math results, examine how performance varies by borough, and determine the city's top ten overall performing schools. Exploring NYC Public School Test Result Scores

VISUALIZING THE HISTORY OF NOBEL PRIZE WINNERS

- The Nobel Prize has been awarded annually since 1901 in chemistry, literature, physics, medicine, economics, and peace. This project explored patterns and potential biases in how these honors have been distributed, using data analysis and visualizations to uncover trends, demographics, and category-based insights over time. Visualizing the History of Nobel Prize Winners

ANALYZING CRIME IN LOS ANGELES

- Los Angeles, California attracts people from all over the world, offering countless opportunities — not always of the good kind. In this project, crime data was analyzed to support the Los Angeles Police Department (LAPD) in identifying patterns and guiding smarter resource allocation decisions to better protect communities across the city. Analyzing Crime in Los Angeles

ANALYSING JOB MARKET DATA IN TABLEAU (TABLEAU)

- Conducted exploratory data analysis on real-world job posting dataset for recruitment company DataSearch to identify hiring trends and validate data quality.
- Cleaned and prepared data using filtering, column splitting, and calculated fields for accurate analysis.
- Analyzed salary vs. years of experience, job posting trends, and demand for Data Analysts, Data Scientists, and Data Engineers.
- Identified most in-demand technical skills and compared demand by experience level.
- Developed an interactive dashboard with KPIs to deliver actionable market insights for a recruitment company. Analyzing Job Market Data in Tableau

ANALYSING CUSTOMER CHURN IN TABLEAU (TABLEAU)

- Conducted exploratory data analysis on telecom dataset (Databel) to identify churn drivers and validate data quality.
- Built calculated fields to measure churn rate; analyzed demographics, contract types, payment methods, and service usage patterns.

- Developed interactive dashboards using parameters, dual-axis charts, scatter plots, and maps to deliver actionable retention insights.
- Presented strategic recommendations to reduce churn for subscription-based businesses.
  Analysing Customer Churn in Tableau

CHICAGO DIVVY BIKE SHARING ANALYSIS (TABLEAU)

- Built interactive dashboards analysing rider behaviour, geospatial demand, and demographic segmentation.
- Used calculated fields, parameters, sets, and mapping visualisations to optimise capacity planning.
  Chicago Divvy Bike Sharing Analysis

ANALYSING CUSTOMER CHURN (EXCEL)

- Conducted an end-to-end customer churn analysis for a telecom dataset (Databel) using Excel, performing data preparation, calculated fields, and in-depth exploratory analysis to identify key churn drivers.
- Built PivotTables and an interactive dashboard highlighting KPIs, churn reasons, demographics, contract types, and usage patterns to deliver actionable retention insights.
- Translated analytical findings into a cohesive visual story, enabling data-driven recommendations to reduce customer churn.
  Analysing Customer Churn in Excel

CUSTOMER CHURN PREDICTION MODEL (PYTHON, ML)

- Built classification model using Scikit-learn on 10,000+ banking records.
- Applied feature engineering, model evaluation (ROC-AUC, precision/recall), and optimisation techniques.
- Delivered retention insights for high-risk customer segments.

JAVA TICKETING SYSTEM

- Developed GUI-based event booking system with real-time seat allocation and database integration.
